

## DRILL PIPE PUP JOINTS

### DRILL PIPE PUP JOINTS

PARVEEN's D.P. P. J. is important drill stem component for special drilling or testing operations. This short drill pipe section is used to locate the top box of the drill string at a specified distance from the rig floor.

PARVEEN's D.P. P. J. is manufactured either from round bar or by machining heavy wall tubing from AISI-4145 H Material.
